- No hardware required
- Fully hosted and automated

You can provide immediate response to your potential buyer searching for more information about your listing. Providing a number on your 'For Sale' sign allows your customers to quickly SMS for further information that can be returned by email, MMS (up to 3 images) or SMS.

So now when the potential buyer is having that evening walk, sitting in traffic or taking the family out for a Sunday drive they have access to more information on the house for sale. Simply by SMS'ing.

How it works:

Buyer SMS's the sign ID number to 0427 84 12 12

The buyer then receives an MMS from TIM4biz with pictures and details.

The agent also receives an SMS with the sign ID number and a mobile phone number of who made the enquiry.

When a the property is sold TIM4biz.com generates an activity report and costs for the seller.

Simple and you'll be glad to hear it so easy to incorporate into your existing or new signage systems!
